Native American Consultation Per AB 52 Requirements

ESA

July 9, 2019

Joseph Ontiveros, Cultural Resources Director
Soboba Band of Luiseño Indians
PO Box 487
San Jacinto, CA 92581

RE: Notice of Proposed Project Pursuant to Public Resources Code Section 21080.3.1 ("AB 52") *Goetz Road Potable Water Storage Tank and Transmission Pipeline Project*

Dear Mr. Ontiveros:

Pursuant to California Assembly Bill (AB) 52, the Eastern Municipal Water District (EMWD) is providing you with formal notification of the Goetz Road Potable Water Storage Tank and Transmission Pipeline Project (Proposed Project) in the City of Menifee and City of Perris, California. EMWD, as lead agency, is contacting California Native American tribes traditionally and culturally affiliated with the Proposed Project's geographic area who have requested formal notification of projects pursuant to Public Resources Code (PRC) Section 21080.3.1(b). EMWD previously initiated consultation with your Tribe in 2016 about this Proposed Project. Since that time, EMWD has made changes to the Proposed Project design. EMWD is reinitiating consultation with your Tribe at this time.

The Proposed Project would involve construction and operation of an 8 million gallon (MG) potable water storage tank (previously 13 MG), a chlorination disinfection facility, and associated transmission pipeline, in order to address a number of deficiencies in EMWD's 1627 pressure zone as identified in EMWD's Water Facilities Master Plan. Portions of EMWD's 1627 pressure zone are hydraulically isolated due to major north-south pipeline corridors that lack east-west capacity. Additionally, the pressure zone has low pressure, deficient storage, and insufficient pumping capacities. The Proposed Project would correct existing storage deficiencies and provide additional storage volume for existing and proposed development in the 1627 pressure zone.

The proposed Goetz Road potable water storage tank and chlorination disinfection facility would be constructed on a 2.85-acre parcel owned by EMWD located in the City of Perris. A new

Board of Directors

transmission pipeline is proposed in the City of Menifee to connect the new tank to the existing 1627 transmission pipeline within Murrieta Road. The Proposed Project is also including an alternative pipeline alignment and is being considered in the alternative analysis. Maps depicting the Proposed Project and alternative pipeline alignment is enclosed with this letter (see Figures 1 and 2).

Construction of the storage tank, chlorination disinfection facility, and stormwater drainage facilities would require a footprint of approximately 2.85 acre for construction (and subsequent operation). Installation of the proposed tank would involve excavation between 6 feet and 24 feet below ground surface (bgs).

Construction of the proposed transmission pipeline would involve trenching using a conventional cut and cover technique. Localized trench and pipeline dewatering may be required depending on location, as the pipeline would be installed up to 48 inches bgs. Pipelines would be installed within a private development to be concurrently constructed and within public rights-of-way of Thornton Avenue and Murrieta Road.

If you would like to request formal consultation pursuant to AB 52, please contact me, Joe Broadhead, via the address, phone, or email provided below within 30 days of receipt of this notice.

RE: Notice of Proposed Project Pursuant to Public Resources Code Section 21080.3.1 ("AB 52") *Goetz Road Potable Water Storage Tank and Transmission Pipeline Project*

Dear Ms. Mauck:

Pursuant to California Assembly Bill (AB) 52, the Eastern Municipal Water District (EMWD) is providing you with formal notification of the Goetz Road Potable Water Storage Tank and Transmission Pipeline Project (Proposed Project) in the City of Menifee and City of Perris, California. EMWD, as lead agency, is contacting California Native American tribes traditionally and culturally affiliated with the Proposed Project's geographic area who have requested formal notification of projects pursuant to Public Resources Code (PRC) Section 21080.3.1(b).

The Proposed Project would involve construction and operation of an 8 million gallon (MG) potable water storage tank, a chlorination disinfection facility, and associated transmission pipeline, in order to address a number of deficiencies in EMWD's 1627 pressure zone as identified in EMWD's Water Facilities Master Plan. Portions of EMWD's 1627 pressure zone are hydraulically isolated due to major north-south pipeline corridors that lack east-west capacity. Additionally, the pressure zone has low pressure, deficient storage, and insufficient pumping capacities. The Proposed Project would correct existing storage deficiencies and provide additional storage volume for existing and proposed development in the 1627 pressure zone.

The proposed Goetz Road potable water storage tank and chlorination disinfection facility would be constructed on a 2.85-acre parcel owned by EMWD located in the City of Perris. A new transmission pipeline is proposed in the City of Menifee to connect the new tank to the existing 1627 transmission pipeline within Murrieta Road. The Proposed Project is also including an alternative pipeline alignment and is being considered in the alternative analysis. Maps depicting
