

Water Wise Lifestyle Notes

Get more water wise with EMWD's new Drip Kit and Drip Rebate programs for residential, commercial, and multi-family customers.

Why convert from overhead spray to drip?

- Reduce run-off
- Water directly to root zone
- Improve water use efficiency
- Less water loss to evaporation
- Water seeps slowly into the soil
- Less weeds
- Easy installation
- Low maintenance
- Can result in up to 60 percent water savings (on the drip valve only)

These programs are available on a first-come, first serve basis, so check it out today at www.emwd.org/rebates.
