

# Investments in Reliability

As California faces dry conditions this year, EMWD is proud to be a national leader in water supply reliability.

Our customers have proactively invested in a diverse and locally-controlled water supply portfolio to reduce our demand on imported water supplies. The result is that EMWD is uniquely prepared to meet the needs of our customers during wet and dry years.

To learn more about our investments in reliability, please visit [www.emwd.org/gwr-plus](http://www.emwd.org/gwr-plus).

## Local Groundwater

EMWD replenishes its local groundwater basins to ensure long-term sustainability

## Recycled Water

EMWD is a national leader in water reuse and uses 100 percent of its supplies in normal years

## Groundwater Desalination

EMWD's third desalter will come online this year and provide for an additional 15,000 homes annually

## Coming Soon: Your Annual Water Quality Report

EMWD is proud to provide you with a safe and reliable source of drinking water.

By July 1 each year, EMWD releases its annual Consumer Confidence Report, which details the sources and water quality testing of your drinking water supplies. EMWD conducts tens of thousands of tests each year to ensure your water is safely delivered each time you turn on the tap.

Be sure to check out [www.emwd.org](http://www.emwd.org) in late June to learn more about your drinking water.
