

# EMWD PARTNERS WITH THE CITY OF PERRIS TO BRING FUTURE WATER AND SEWER SERVICE

## Dear City of Perris Water & Sewer Division Customer:

Eastern Municipal Water District (EMWD) is excited to announce that it has partnered with the City of Perris to bring future high-quality, reliable water and wastewater service to customers currently served by the City of Perris.

Throughout 2024, EMWD and the City of Perris will be working behind the scenes as part of a consolidation process, where EMWD will eventually take over services to more than 4,000 customers currently served by the City.

A majority of the City of Perris is already served by EMWD. This change is for those customers who are served by the City of Perris Water & Sewer Division.

EMWD is proud to serve a high-quality and safe water supply to nearly 1 million people living and working in western Riverside and northern San Diego Counties. We will provide that same level of service to our newest customers in Perris, while ensuring there are no financial or service level impacts to our existing customers as part of this consolidation process.

Learn more about the consolidation of the City of Perris Water & Sewer Division to EMWD services on our website at [www.emwd.org/perris-consolidation](http://www.emwd.org/perris-consolidation).

Sincerely,

**Eastern Municipal Water District**
