## PROJECT DESCRIPTION:

In the summer of 2024, Eastern Municipal Water District (EMWD) will begin work on the Good Hope Olive Area Water System Improvements Project. The project will install over 7,000 feet of eight-inch-diameter waterlines in the community of Good Hope, and it will see remote water meters relocated closer to customer properties. The new pipelines will connect to the existing water lines along Eucalyptus Avenue, Main Street, Sharp Road, and Club Drive. The project will improve water delivery and pressure for the community.

The project will improve water delivery and pressure for the community.

## PROJECT IMPACTS/WHAT TO EXPECT:

During construction residents can expect:

- Temporary noise, dust, and vibrations from construction work
- Temporary water service interruptions with advance notice
- New installation and replacement of water meters, back flow devices, and pressure regulator valves (PRV)
- Potential lane closures during daytime work, but access to residents will be maintained

## PROJECT TIMELINE:

Construction of the pipeline is anticipated to begin in the summer of 2024 and be completed by the late winter of 2025.
