## PROJECT DESCRIPTION:

In summer 2024, Eastern Municipal Water District (EMWD) will begin work on the Mead Valley Cajalco Corridor Water System Improvements Project-Phase II. The project will install over 4,000 feet of eight-inch diameter pipeline in the community of Mead Valley, and it will see remote water meters relocated to the front of properties. The

new pipelines will connect to the existing water lines along Oakwood Street, Carroll Street, Day Street, and Pinewood Street, in the area south of Cajalco Road. The project will improve water delivery and pressure for the community.

## PROJECT IMPACTS/WHAT TO EXPECT:

During construction residents can expect:

- Temporary noise, dust, and vibrations from construction work
- Anticipate temporary water service interruptions with advance notice
- New installation and replacement of water meters, back flow devices, and pressure regulator valves (PRV)
- Lane closures can occur during daytime work, but access to residents will be maintained

## PROJECT TIMELINE:

Construction of the pipeline is anticipated to begin in the summer of 2024 and be completed by the late winter of 2025
