The federal government has identified 16 critical infrastructure sectors whose assets, systems, and networks are considered so vital to the United States that their incapacitation or destruction would have a debilitating effect on security, national economic security, or national public health or safety. These 16 critical infrastructure sectors may continue their work even when Stay At Home Orders are placed into effect, because of the importance of these sectors to Californians' health and well-being.

Eastern Municipal Water District provides water and wastewater services. Therefore, the company is within the Water and Wastewater sector specified by the State of California and the federal government as a critical infrastructure sector. Any Contractor or Consultant whose position is essential to maintain continuity of our operations, is therefore exempt from any potential Stay at Home Order.
