Re: OSHA Inspection #317730372

To Whom It May Concern:

Downing Construction, Inc. received two citations from Cal/OSHA after reviewing our Injury & Illness Prevention Program's Heat Illness Prevention section that was inadvertently not updated in a binder at our office located in Redlands. The jobsite IIPP was updated and all procedures were being followed in the field (See the Inspector's Investigation Report, page 4 of 6, referencing that the High Heat Procedures were performed and in place). Please see the enclosed Cal/OSHA documents listed below.

1. Document Request Sheet from DIR, Division of Occupational Safety and Health.
4. Notice of Intent to classify citation as serious.
5. Contractor's response to Notice of Intent.
7. Settlement terms.

The citations were reclassified per the settlement terms and the fines were reduced. In addition, the binder in question was updated immediately to avoid any discrepancy in the future. Please note that the citations were regulatory, and/or general as stated by Cal/OSHA, and not directly related to a safety violation.

Downing Construction Inc.'s employee suffered a heart attack at the end of a work shift, which was investigated and found to be of no fault of our safety procedures and no Cal/OSHA citation was issued. Please contact me if you have any questions.

Thank you,

Michelle LaVanWay

Dear Employer:

An Inspection was opened by Robert Carr at a place of employment located at 77200 California Dr, Palm Desert, CA 92211 on 8-13-2014. The purpose of this form is to inform you that the Division intends to cite as “serious” the following alleged violation:

Prior to or during the course of the investigation, the Employer’s written Heat Illness Prevention Program did not contain the high-heat procedures.

This alleged violation may be cited as a violation of one or more of the following regulations of Title 8 of the California Code of Regulations, or any other applicable regulation:

TBCCR 3395(e)

The Division may also classify the violation as "willful serious" or "repeat serious".

You are encouraged to provide, in writing, any statements and supporting evidence showing that the Division should not classify the citation as “serious”. Factors the Division may consider include the following:

1. Training for employees and supervisors relevant to preventing employee exposure to the hazard or to similar hazards
2. Procedures for discovering, controlling access to and correcting the hazard or similar hazards
3. Supervision of employees exposed or potentially exposed to the hazard
4. Procedures for communicating to employees about your health and safety rules and programs
5. Any additional information that you wish to provide such as:
   a. An explanation of the circumstances surrounding the alleged violative events
   b. Why you believe a serious violation does not exist
   c. Why you believe your actions related to the alleged violative events were reasonable and responsible

Use “Employer’s Signed Response to Notice of Intent to Classify Citation As Serious” form (attached). Additional statements and supporting evidence can be attached to the form. Use a separate form to respond to each “Notice of Intent to Classify Citation As Serious” received from the Division.

Please return the form, along with your additional statements and supporting evidence. Also, attach a copy of this notice. Information received by 1-29-2015 will be considered before the Division issues the citation. Information received after this date may not be considered before the Division issues the citation. If no information is received at all, the citation may still be issued.

If you have any questions, please contact me at the phone number or address in the letterhead.

Re: OSHA Inspection #1263590

To Whom It May Concern:

Downing Construction, Inc. experienced a fatality on one of our projects located in Fontana, CA that involved a City employed soils technician and Downing's loader. The technician attempted to take a soils compaction test immediately behind a working loader without notifying any of Downing's personnel nor the City inspector, who was also onsite at the time of the incident.

As of today, Downing received a Notice of Intent from Cal/OSHA, our attorney has filed a Formal Appeal and we are schedule for a dispute hearing.

Please let me know if you have questions.

Re: OSHA Inspection #1426007

To Whom It May Concern:

Downing Construction, Inc. received Citations from OSHA on the above-referenced Inspection due to an incident on 6/3/2019 where an equipment operator was working on a slight incline in our construction yard screening rock and when he backed up and stopped for another piece of equipment to pass he failed to keep the loader he was running completely stopped by relaxing his foot on the brake. Although the loader was in neutral, due to the slight incline this allowed the loader to slowly roll backwards then pinning another employee between the loader and another piece of equipment parked in the yard. An investigation was performed, citations were issued and a formal Appeal has been filed.

Please let me know if you have questions.
