QUESTIONS & ANSWERS

Ferreira Construction

Q1. Will materials on the approved list require inspection? What materials require the inspection - PVC pipe, valves, air vacuum assemblies, hydrants, copper? What hold point do you need to inspect on those items?

A1. All materials on this project, whether listed on the Approved Materials List or not, are required to pass through standard inspection requirements, as detailed in the Specifications. Please review GENERAL CONDITIONS, Section E - Inspection and Tests, and Section F - Labor & Construction to assist with details. The hold point for inspection depends on the items under inspection. No specific time can be estimated or provided at this point.

Q2. The alignment calls out for various sections of restrained joints. It is our understanding that fusible PVC does not require restraints. Does the agency want mega lug restraints for these sections in lieu of fusing?

A2. The project calls for restrained joints in areas where connections and appurtenances, such as valves, require restraint. A Fusible PVC joint constitutes a restrained joint, and thus doesn’t require additional restraints. Fusible PVC pipe lengths shall be fused in their entirety and shall be staged prior to installation, except where joints are required for ductile iron fittings, as shown on the Drawings. Mega lug restraints are acceptable for the restrained portions as shown on the Drawings and in accordance with Section 15057 – Ductile Iron Water Pipe and Fittings. Also refer to Section 15065-6, Part 2.04 for Fusible PVC and ductile iron mechanical and flanged fittings.

Q3. Are we allowed to close the road during work hours? The encroachment permit does not mention whether it is allowed.

A3. The encroachment permit provided in the Specifications is a “conditional permit” and has been provided as a place-holder permit for this project. The Contractor will be required to pull a duplicate permit from the City of Menifee, and comply with all the requirements on the permit. It is the Contractor’s responsibility to provide the City with accurate project information and specific construction requirements pertaining to the project when obtaining the permit. As part of the encroachment permitting process, traffic control plans will be required to be submitted and approved by the City. These traffic control plans should include any specific requests, such as proposed road closures. The City is the authorizing jurisdiction for these specific requests.
Q4. About the required insurance, will you need an installation floater or a builder's risk?

A4. Builders "All Risk" is required. Please refer back to SC-08 and Insurance Sample included in the Specification for requirements.

Q5. Where are the services located in relation to the interconnects? Can you provide a map with the affected services and hydrant locations?

A5. All existing pertinent appurtenances are labeled with call-outs on the Drawings. It is the Contractor's responsibility to field-verify the existing services and proposed interconnections prior to any construction activity. No additional information will be provided.

T. E. Roberts, Inc.

Q1. I was wondering if a Pollution policy for $1MM/$2MM would be accepted for the Paseo Vivora Pipeline Replacement Project bidding on 8-22-17?

A1. SC-08 requirements will not be amended.
