

## How it Started...

## How it's Going...

EMWD's Groundwater Reliability Plus program is an important part of our overall water supply portfolio.

EMWD operates approximately 30 groundwater wells with more planned in the coming years to help provide our customers with a safe, reliable and low-cost water supply source.

For more information on our Groundwater Reliability Plus program, please visit [www.emwd.org](http://www.emwd.org)

This holiday season, EMWD asks you to do your part to properly dispose of fats, oils and grease (FOG) by not placing them down the drain.

When FOG hardens, it can clog your drains or the sewer system, leading to costly repairs. Be sure to dispose of FOG by letting it cool and placing it in a waste bin.

For more information, please visit us at [www.emwd.org/sewersmart](http://www.emwd.org/sewersmart)
