

Smart Meters Saving Money, Increasing Efficiency

Eastern Municipal Water District (EMWD) has embarked on a multi-year effort to install automated meters, which will improve reading accuracy, save on labor costs and minimize water loss.

EMWD plans to install 44,000 of the meters this year as part of an accelerated installation plan for Automated Metering Infrastructure,

Automated meter installations

2017: 44,000

2018: 32,000

2019: 5,000

commonly known as AMI, that was authorized by the Board of Directors in 2014. The program is one example of the ways EMWD is investing in projects and equipment to benefit customers.

So far, 70,359 highly efficient devices have been installed, accounting for nearly half of EMWD's 151,299 meters. The project is scheduled for completion in May 2019.

The real advantage of AMI technology is that it provides a remote data link between the meter and the water district for real-time monitoring. Unlike traditional drive-by or walk-by meter reading, AMI technology allows for near hands-free evaluation with fewer vehicle trips and employee hours.

These smart meters provide daily information about how much water is used by individual customers and can alert them when they are nearing their water budget. With AMI, EMWD will be able to issue leak detection notifications and plans an online site where customers can access information about their water use.

AMI can pinpoint leaks at homes and in the distribution system, eliminating costly emergency repairs.

The \$12 million AMI program is funded in part by grants from the California Department of Water Resources for programs that increase water conservation and energy savings and reduce carbon emissions.

NOTICE OF PUBLIC HEARING

Date: November 15, 2017

Time: 9 a.m.

Location: Eastern Municipal Water District Board Room
2270 Trumble Road, Perris, CA 92570

The Board of Directors of Eastern Municipal Water District (EMWD) will conduct a public hearing to consider changes to the water and sewer rate structures and rates set forth herein. The proposed changes are based on a cost of service study that was completed and adopted by the Board in March 2017.

Any customers or property owners may appear at the hearing to make comments regarding the proposed change. To file an opposition, property owners and tenants of real property who are directly liable to pay water bills may submit a written protest.

Written protests may be mailed or delivered in-person to **Eastern Municipal Water District, Attention: 2017 Proposed Rates, PO Box 8300, Perris, CA 92572-8300**. Protests must include: your name, parcel number and/or service address, and your signature. Protests submitted by email or other electronic means do not count as formal written protests. All written protests must be received prior to the conclusion of the public hearing.

More information about the proposed changes is available in this document and online at: www.emwd.org/ProposedRates.

Proposed Water Service Rates

In June 2012, EMWD's Board of Directors opted to provide an eight-year phase out of the discounted agricultural water rates to the potable water rates. The phase out process will conclude in 2019.

EMWD proposes agricultural water rate increases as follows:

Water Supply & Reliability Capital Projects Charge Per Equivalent Meter Size	Current Charge	Proposed Monthly*	
		Charge Effective 1/1/2018	Charge Effective 1/1/2019
	\$3.25	\$3.35	\$3.65

*Amount will be prorated based on billing cycle.

Rate Code	Daily Service Charge	Proposed Daily Service Charge		Commodity Rate per Acre-Foot	Commodity Rate per Acre-Foot	
	As of 1/1/2017	As of 1/1/2018	As of 1/1/2019	As of 1/1/2017	As of 1/1/2018	As of 1/1/2019

EMWD Drought Stages

Congratulations EMWD customers for continuing to use water wisely! EMWD adopted its Water Shortage Contingency Plan (WSCP) to regulate the delivery and consumption of water during water shortages. The higher stages of the Plan are designed to encourage customers to reduce water use by temporarily reducing customer water budgets in varying stages depending on the severity of the shortage. EMWD's Board of Directors has the authority to initiate or terminate water shortage contingency measures described in the Plan, and takes such actions as needed in public meetings.

Stage 1: Supply Watch – Up to 10 percent voluntary reduction of water use.

Stage 2: Supply Alert – Up to 25 percent voluntary reduction of water use. Currently EMWD asks that customers voluntarily save 10 percent.

Stage 3: Mandatory Waste Reduction – Enforced through changes to the water budget-based tiered rates as follows:

Stage 3a: No variances or adjustments allowed for filling swimming pools, establishing landscapes, or leaks that are not repaired within 48 hours;

Stage 3b: Tier 3 (*Excessive water use*) allocations reduced by 50 percent;

Stage 3c: Tier 3 allocations are eliminated.

Stages 4 and 5: The Water Shortage Contingency Plan

– Reduces customers' water budgets by varying amounts, depending on the severity of the shortage. As described on page 4, under normal conditions, customers who stay within budget are charged at the lowest rates in tiers 1 and 2. In stages 4 and 5, budgets are reduced, which would cause a customer going over budget to be charged at a Tier 4 rate.
