<tr>
<th>Job title</th>
<th>Distribution Operator III</th>
</tr>
</thead>
</table>

**GENERAL PURPOSE**

Under direction, inspects, operates, maintains, services and performs operational repairs to facilities and equipment used in the storage, treatment and distribution of potable and reclaimed water; serves as a leader on assigned projects with responsibility for directing and reviewing the work of project staff; performs operational adjustments to the distribution system to ensure compliance with quality and regulatory requirements; responds to water leak and emergency repair situations; and performs related duties as assigned.

**DISTINGUISHING CHARACTERISTICS**

This is the advanced-level classification in the Distribution Operator series responsible for performing the most complex work assigned to the series. Incumbents regularly work on tasks which are varied and complex, requiring considerable discretion and independent judgment. Positions in the classification rely on experience and judgment to perform the full range of water distribution related duties. Assignments are given with general guidelines and incumbents are responsible for establishing objectives, timelines and methods to perform with considerable latitude for the exercise of independent judgment. Work is typically reviewed upon completion for soundness, appropriateness, and conformity to policy and requirements. This class is distinguished from the Water Operations Supervisor in that the latter is a full-supervisory class with accountability and ongoing decision-making responsibilities associated with the work.

Employees in this classification are subject to on-call, which may include rotating-duty schedule, weekends and 24-hour emergency call out with little or no notice.

**SUPERVISION RECEIVED AND EXERCISED**

Receives direction from assigned supervisory or management personnel. Exercises technical and functional direction over and provides training to lower-level staff.

**TYPICAL DUTIES AND RESPONSIBILITIES**

The duties listed below are intended only as illustrations of the various types of work that may be performed. The omission of specific statements of duties does not exclude them from the position if the work is similar, related or a logical assignment to this position.
Performs technical duties in the treatment and operation of systems through monitoring, inspecting and maintaining the potable and reclaimed water production, storage, pumping equipment and distribution systems, including reading meters, pressures, chlorine residuals, basic total dissolved liquids (TDS) and nitrate levels and samples.

Interprets, and determine problems in the system, from information on gauges, meters, charts and graphs; operates pumps, valves and related equipment; regulates flow and pressure to assure good quality and positive pressure to the system.

Serves as project leader on assigned projects; plans, schedules, oversees and reviews the work of staff assigned to specific work projects.

Researches new operational methods, techniques and equipment and recommends their application.

Plans and lays out jobs from blueprints, drawings, sketches, or verbal instructions; maintains records in the form of blueprints, plans, and specifications for industrial and waterworks equipment and machinery.

Performs operational adjustments to the distribution system to ensure compliance with quality and regulatory requirements, including but not limited to, flushing trouble areas and pulling samples for lab and determining a plan to correct water quality problems; calculates chemical treatment and blends at wells and makes daily systems changes to plants, wells and storage sites.

Performs preventive maintenance program tasks on pumps, valves, engines, motors and related production, storage and distribution system equipment and facilities; organizes pump testing using various head and flow instruments.

Collects and analyzes water samples from various locations within the distribution system to monitor and maintain water quality daily.

Inspects production, treatment, storage and distribution facilities for maintenance and cleaning needs, including but not limited to climbing on top of tall steel tanks, climbing down into reservoirs, vaults and other confined spaces, working in large reservoirs, and climbing on ladders to service pumps and other equipment following District safety standards; instigates interior recoating of District water storage reservoirs; maintains building and grounds in a clean and orderly manner; follows District safety standards.

Receives chemical shipments, participates in the unloading process and records into inventory; inspects shipments received for standards compliance.

Responds to and confirms the existence of water main breaks, leaks, hydrants, etc.; contains and repairs minor leaks in accordance with safety guidelines; places safety signs and traffic-control barricades, isolates main breaks by operating distribution system valves; makes emergency shut-downs; notifies customer of shut downs; establishes alternate routes and system operations to meet emergency demands; sets up temporary water where needed; coordinates activities with other departments, outside agencies, and contractors.
Eastern Municipal Water District  
Job Title: Distribution Operator III  
Last Update: March 2020

- Responds in person to inquiries and investigates and resolves customer complaints.
- Transports and installs chlorine gas cylinders at disinfection facilities; responds to chlorine leaks to test air quality with a gas detector to verify leak and notify appropriate individuals; follows established regulations, guidelines, policies and procedures in the handling and transporting of hazardous materials.
- Documents and maintains a variety of records and reports advising on overall system operations and shutdowns.
- Observes and complies with all District and mandated safety rules, regulations, and protocols.
- Performs related duties, as assigned.

REQUISITED QUALIFICATIONS

Knowledge of:

- Principles, methods and techniques for operating pumps, valves, electric motors, diesel and natural gas engines and electronic, computerized and manual control systems.
- Functions and servicing requirements of the equipment used in a water distribution system.
- Principles, methods, practices and techniques utilized in chemical, bacteriological and biological analyses.
- Operational characteristics of water distribution systems.
- Mathematical concepts.
- Principles of providing functional direction and training.
- Federal and state safe drinking water laws and regulations.
- Principles and practices of record keeping.
- District and mandated safety rules, regulations, and protocols; confined space, gas detector, fall arrest, electrical hazards, LOBO, chlorine.
- Techniques for providing a high level of customer service by effectively dealing with the public, vendors, contractors, and District staff.
- The structure and content of the English language, including the meaning and spelling of words, rules of composition, and grammar.
- Modern equipment and communication tools used for business functions and program, project, and task coordination, including computers and software programs relevant to work performed.

Ability to:

- Operate a variety of pumping, treatment, control and transmission equipment and machinery, including digital control equipment.
- Provide lead direction and training to assigned project staff.
- Accurately read meters, gauges, valve books, blueprints and schematic drawings.
Eastern Municipal Water District
Job Title: Distribution Operator III
Last Update: March 2020

- Make mathematic calculations, including metrics.
- Prepare records and reports of work performed.
- Operate and maintain hand and power tools pertaining to the work.
- Operate Personal Protective Equipment (PPE), chlorine leak detector, gas detector, fall arrest system, and ventilation equipment in accordance with safety guidelines.
- Understand, interpret, and apply all pertinent laws, codes, regulations, policies and procedures, and standards relevant to work performed.
- Independently organize work, set priorities, meet critical deadlines, and follow-up on assignments.
- Use tact, initiative, prudence, and independent judgment within general policy and procedural guidelines.
- Effectively use computer systems, software applications relevant to work performed, and modern business equipment to perform a variety of work tasks.
- Communicate clearly and concisely, both orally and in writing, using appropriate English grammar and syntax.
- Establish, maintain, and foster positive and effective working relationships with those contacted in the course of work.

Experience:
Any combination of experience and education that provides the required knowledge and abilities is qualifying, along with the specific licenses/certifications as outlined below:

- Three (3) years of progressively responsible experience operating and maintaining pumps and valves similar to those used in a large water distribution system including one (1) year as a Distribution Operator II with the District.

Education:

- Equivalent to completion of the twelfth (12th) grade.

Licenses/Certifications:

- A valid California driver’s license and the ability to maintain insurability under the District’s Vehicle Insurance Policy.
- State of California Water Treatment Operator Certificate Grade II.
- State of California Distribution Operator Certificate, Grade III.
PHYSICAL DEMANDS
The physical demands described here are representative of those that must be met by employees to successfully perform the essential functions of this class. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

Must possess mobility to work in the field; strength, stamina, and mobility to perform medium to heavy physical work; to sit, stand, and walk on level, uneven, or slippery surfaces; frequently reach, twist, turn, kneel, bend, stoop, squat, crouch, grasp and make repetitive hand movement in the performance of daily duties; possible entry into confined spaces and the use of confined entry equipment, to climb and descend ladders, to operate varied hand and power tools and construction equipment, and to operate a motor vehicle and visit various District sites; and vision to inspect and operate equipment. The job involves fieldwork requiring frequent walking in operational areas to identify problems or hazards, which may include working on live electrical wires. Finger dexterity is needed to operate and repair tools and equipment. Employees must possess the ability to lift, carry, push, and pull materials and objects averaging a weight of 50 pounds or heavier weights, in all cases with the use of proper equipment and/or assistance from other staff. Employees must wear and use the proper Personal Protective Equipment (PPE).

WORK ENVIRONMENT
The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this class. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

Employees work in the field and are exposed to loud noise levels, cold and hot temperatures, inclement weather conditions, road hazards, vibration, confining workspace, chemicals, mechanical and/or electrical hazards, hazardous physical substances and fumes, dust and air contaminants. Employees may interact with upset staff and/or public and private representatives in interpreting and enforcing departmental policies and procedures.
