

# McCall Boulevard Pipeline Replacement

## PROJECT SUMMARY

In an effort to continue to provide the community with safe, reliable and quality water service, EMWD will replace its existing 12-inch water line that runs along the western portion of McCall Boulevard in the City of Menifee (from the I-215 to Valley Boulevard). This project is necessary as the current water line is reaching the end of its usable life and has a history of breaks.

**CURRENT STATUS:** Bid / Construction

## ESTIMATED CONSTRUCTION SCHEDULE

- Start: Summer 2020
- Finish: Spring 2021

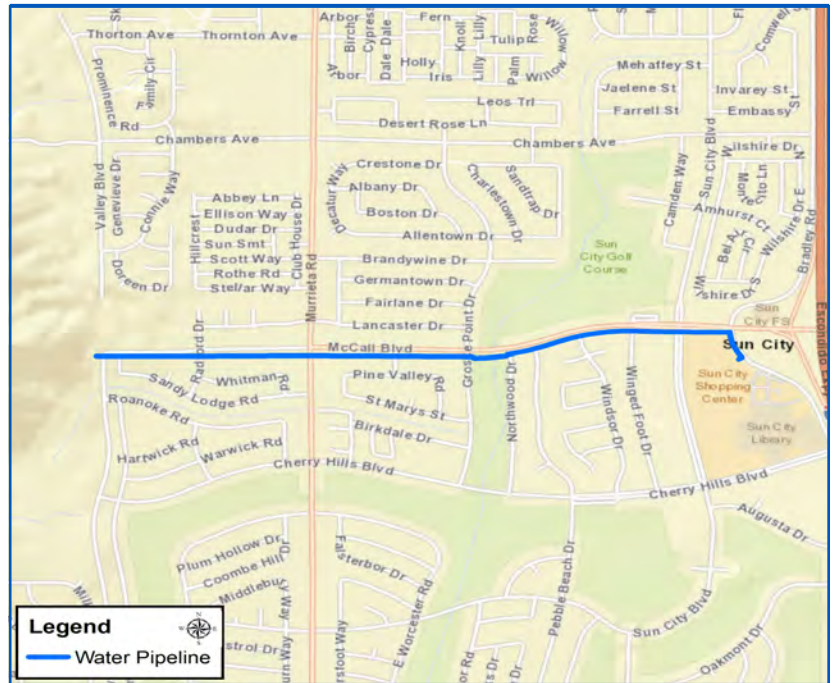

## PROJECT BUDGET

- Estimated Total Project Budget: \$2,881,000
- Estimated Construction Budget: \$2,580,000
- Estimated Grant Percentage: N/A

## PROJECT BENEFIT

EMWD's water conveyance system is designed to provide reliability and redundancy to deliver high-quality water to homes and businesses with minimal interruptions and to promote public safety through the delivery of sufficient pressure and availability to support fire suppression services.
