**Subject: Mountain Avenue West Groundwater Replenishment Facility**

Dear Neighbor:

Eastern Municipal Water District (EMWD) would like to provide you with a new update on construction activities at our Mountain Avenue West Groundwater Replenishment Facility, located at the northeast corner of Mountain and Esplanade avenues in the City of San Jacinto.

Starting the week of February 24, 2020, our contractor will begin installing temporary sound walls at two locations on the site – one each at the north and south ends of the property. These temporary 24-foot-high sound walls will be placed to help dampen and redirect noise away from nearby homes during upcoming 24-hour drilling operations which are currently scheduled to begin on March 9, 2020, and last for several weeks at each of the two locations.

During the installation of sound walls, residents may hear additional noise or feel some vibrations. The installation of the sound walls will be conducted during daytime hours and only on weekdays. At the start of 24-hour drilling operations, our contractor will be on site 24 hours per day, including weekends. We will provide you with another update prior to 24-hour work beginning.

We appreciate your understanding and patience and we look forward to completing this important water supply project work in a timely and safe manner. Should you have any questions, please contact EMWD Public Affairs Officer Kevin Pearson at 951-928-3777, ext. 4219, or at [pearsonk@emwd.org](mailto:pearsonk@emwd.org).

Sincerely,

Kevin Pearson  
Public Affairs Officer
