Subject: Mountain Avenue West Groundwater Replenishment Facility

Dear Neighbor:

Eastern Municipal Water District (EMWD) would like to provide you with a new update on construction activities at our Mountain Avenue West Groundwater Replenishment Facility, located at the northeast corner of Mountain and Esplanade avenues in the City of San Jacinto.

Starting on or after March 9, 2020, EMWD will begin drilling two wells at the project site that will require **24-hour operations for several months**. The first well will be constructed near Esplanade Avenue on the southern portion of the property and the second will be constructed at the northern end of the property near the park on Villines Avenue. These wells will be used to monitor groundwater levels.

To ensure the structural integrity of the wells, 24-hour drilling is required during this period. EMWD has constructed sound walls around the well sites to help reduce noise, dust and vibrations during this work. These sound walls are temporary and will be removed at the completion of well drilling.

EMWD will provide frequent project updates as work progresses to ensure residents are aware of updated schedules. To sign up for email notifications about the project, please visit www.emwd.org/MountainAve.

We appreciate your understanding and patience and we look forward to completing this important water supply project work in a timely and safe manner. Should you have any questions, please contact EMWD Public Affairs Officer Kevin Pearson at 951-928-3777, ext. 4219, or at pearsonk@emwd.org.

Sincerely,

Kevin Pearson
Public Affairs Officer
