

**NOTICE OF PUBLIC HEARING  
FOR  
2019 to 2021 PUBLIC HEALTH GOALS REPORT**

Eastern Municipal Water District (EMWD) has completed the mandated Public Health Goal Report. The report is intended to provide information in addition to the Annual Water Quality Report, or Consumer Confidence Report (CCR). Constituents detected above a public health goal (PHG) or maximum contaminant level goal (MCLG) in the District's water supply between 2019 and 2021 are addressed in this report.

**Document Description**

Pursuant to the requirements of California Health and Safety Code 116470(b), every three years EMWD must prepare a report comparing the District's drinking water quality with public health goals adopted by California EPA's Office of Environmental Health Hazard Assessment (OEHHA) and/or with maximum contaminant level goals adopted by the USEPA. The report includes a numerical public health risk, the category or type of risk, best available treatment technology, and cost estimates associated with constituents detected above a public health goal or maximum contaminant level goal. The purpose is to provide consumers with information on levels of water quality constituents below enforceable, mandatory maximum contaminant levels (MCLs). Public health goals and maximum contaminant level goals are non-enforceable and are based solely on public health considerations.

**Document Availability**

EMWD Public Health Goal Report is available for review at the following locations:

Eastern Municipal Water District, Administrative Offices  
2270 Trumble Road  
Perris, CA 92570
