**Subject: EMWD Construction Near Your Residence**

Dear Neighbor:

On behalf of Eastern Municipal Water District (EMWD), we would like to update you on upcoming construction activities that will take place near your residence in Moreno Valley.

Later this year, EMWD will begin work on a new groundwater well to be located at the City of Moreno Valley Corporate Yard, located on Santiago Drive. This well is part of our new Perris North Groundwater Program, which will help provide long-term water quality benefits to the region. This well will extract groundwater that is currently unusable and treat it to improve the quality and quantity of our water supplies.

In early March, EMWD will begin underground pipeline work associated with the well construction. This work should last approximately one week and traffic control measures will be in place, including flag operators to help direct traffic in the construction zone near Santiago Drive and Ninya Avenue. This work will be done during daytime hours on weekdays. EMWD asks that motorists please use extra caution for the safety of our work crews and the surrounding community.

EMWD is expediting this pipeline work to coordinate with storm drain improvements being done by a local developer on Santiago Drive. This will help minimize impacts to the community.

Prior to and throughout the construction of the groundwater well, EMWD will provide you with more information about the well drilling process and any updated timelines for that work.

EMWD appreciates your patience and understanding as we work to complete this important project that will help provide your family with a safe and reliable water supply source for future generations.
