TRAUTWEIN CONSTRUCTION
COMPANY RESUME

Trautwein Construction Inc. was established in 1989 as a General Engineering Contracting Company specializing in underground pipeline: primarily water, sewer and storm drain. Public works projects comprise most of Trautweins work load, but competitive pricing has afforded us many private contracts throughout Southern California. Since 1989, Trautwein Construction has worked in all areas of Southern California and has completed over $225 million in construction projects, all of which were completed on time, within budget and without any discourse.

Trautwein Construction employs approximately 35 workers covering trades including, but not limited to, equipment operators, teamsters, pipe fitters, welders, laborers and foremen. Field personnel have been certified in Confined Space, OSHA 10 HR., CPR, First Aid, as well as Competent Person training. The average tenure of employees working at Trautwein Construction is 12 years experience with key personnel at 20 years or better. All crews, whether large or small, are directed by an onsite foreman knowledgeable of all aspects of work and safety. Projects are seen through until completion, utilizing the same foreman and crew which were initially established, providing continuity and quality work with a 100% completion rate within stipulated timelines. Trautwein can assure the proper manpower, equipment, sub contractors, leadership and an exemplary safety record to all aspects of work performed in the scope of construction projects. Trautwein can also assist with engineering, potholing, grading, plant facilities, structures, pond remediation, emergency response or a wide variety of construction services covered under our Class A General Engineering License (773764A).

Trautwein Construction provides on call emergency response and maintenance with the following agencies: City of Corona, City of Riverside, Eastern Municipal Water District, LA Sanitation District, SAWPA, IEUA, Home Gardens County Water District, Rubidoux Community Services District, El Toro Water District and Cucamonga Valley Water District.

Trautwein Construction can bond projects up to 75 million aggregate dollars, and provides standard insurance of $5,000,000 aggregate to all of our projects. Trautwein is not a union shop, but recognizes the State of California prevailing wage rates as required by specific projects. Financially, Trautwein is a solid company with no debt and the endorsements of banks which will back large scale projects if needed. Trautwein will provide any additional information to help in reviewing our company’s qualifications in performing future projects.
