

Water Bottle Fill Station Program

For qualifying schools in Eastern Municipal Water District's (EMWD) service area, we invite your school to "tap into" our Water Bottle Fill Station Program **AT NO COST TO YOU***!

EMWD offers this turnkey program to schools who agree to promote the value of tap water by replacing an existing drinking fountain with a water bottle filling station and a co-branded sign. Students, teachers, and guests will appreciate cool, clean, drinking water, made available free-of-charge*!

To qualify, your school must:

- Be located in EMWD's water service area;
- Identify a water bottle fill station location in a highly visible public space;
- Agree to place a co-branded sign, provided by EMWD, near the water bottle fill station; and
- Maintain the fill station and signage for at least five years.

EMWD will:

- Coordinate an agreement of terms and conditions for two-party signature;
- Approve the proposed water bottle fill station location;
- Provide signage, approved by both parties (see co-branded sign sample above);
- Coordinate procurement and installation of the water bottle fill station;
- Promote the water bottle fill station location on EMWD's website.

Water bottle fill station features and benefits may include:

- Single- or bi-level configurations (see respective photos to the right).
- Quick fill rate of 1- 1.5 gallons per minute (1 GPM for refrigerated models).
- Easy-to-clean, stainless steel exterior.
- A visual indicator of the quantity of plastic water bottles saved from waste.
- Vandal-resistant bubbler and push-button operation.
- No filter needed, saving time and money.
- ADA and Division of the State Architect (DSA) compliant.
