

Tap into Water Industry Jobs

Join the Youth Ecology Corps!
Office Positions Available

Eastern Municipal Water District (EMWD) has partnered with the Riverside County Workforce Development Board, and California Family Life Center to offer the Youth Ecology Corps program. This program provides short-term job opportunities to young adults who are interested in exploring career opportunities in the water industry and related fields.

About the Program

Participants of the Youth Ecology Corps program will receive safety and ethics training; professional development workshops; introductions to EMWD staff; and tours of such facilities as a water filtration plant, regional water reclamation facility, and desalter.

Job Opportunities

EMWD provides a variety of part-time job opportunities, based on current needs and youth interest. Participants must be available mornings for 12 weeks, 20 hours each week (up to 240 hours), and must have reliable transportation to/from EMWD.

Here are some examples of available positions and designated duties:

Office Assistants will assist EMWD staff with document sorting, scanning, and filing.

Records Management Assistant will help with the organization and electronic storage of District files.

Public and Governmental Affairs Assistant will learn to update the Intranet.

Education Assistant will organize safety binders, inventory maps and supplies, and update documents.

Testimonials from youth who have participated in the program

“The Youth Ecology Corps Program provided me the technical skills necessary to succeed in an office environment. Under the mentorship of staff, I’ve had the opportunity to manage a variety of projects within the Contracts Department, improving my ability to adapt to any situation that comes my way!”

Jennifer Rith
Field Engineering
Spring 2018

“Youth Ecology Corps was a beneficial and unique program that I had the opportunity to be a part of after graduating from college. Working in the water quality lab awarded me with hands-on training and showed me what qualities it takes to be a successful employee in the water industry.”

Eric Morales
Laboratory
Summer & Fall 2017
